

*THAT IS MADE BY THE LOVE AND OTHER POEMS*

By Adolf P. Shvedchikov

That is made by the love,  
It remains forever in the heart,  
Everything will be back to the beginning,  
Let the spindle to spin thread.  
And the window will open again,  
Spring wind breaks into it  
And your heart will beat fast  
Believe me, anyway.  
After all, only one thing is certain:  
Again the world will wake up in the morning,  
And the nightingale will be filled with a trill,  
When will not be us a long time ago...

**WHEN ALLURING NIGHT FALLS**

When alluring night falls,  
You gently whisper to me in a low voice:  
Come to me, I'm real, touch my silk hair.  
I breathe lavender and rose,  
I am fragrant with acacia,  
Kiss my pink lips and enjoy the feminine grace!  
Swim being embraced by my arms  
Without a compass and choke with excitement,  
Get to know the bottomlessness of love's cosmos,  
Remember the sweet moment!

**LISTEN TO MY LOVE SONG**

Listen to my love song,  
Take it closer to your heart  
And let our souls merge  
In this bright and joyful May.  
Bottomless sky lit up  
And the hearts beat violently,  
Yesterday's nonsense came true,  
Let love do everything to the end!

**THE EARTH BALL IS SPINNING**

The earth ball is spinning,  
It sees off day by day,  
Only no one will know  
That you are not with me again.  
Grief-sorrow weaves  
Nest in the heart.  
Where are you, my darling,  
Graceful, nice, cheerful?  
I remain alone,  
I cannot embrace horizon by the eye,  
Sorry that I cannot be now with you,  
Will we be together again?

**TELL WHY I NEED TO FIGHT WITH MY FEELING**

Tell why I need to fight with my feeling  
Why run when you are so drawn to  
Let burn, let fate deceive,  
Let me walk on unmarked ground.  
Tell why I need to fight with my feeling  
When you, too, passion seized  
So can it really end all crying?  
Risk, ride, be on horseback again!

**Bio**

Born May 11, 1937 in Shakhty, Russia. In 1960 he graduated from Moscow State University, Department of Chemistry. Ph.D. in Chemistry in 1967.
